**Subject:** [External\_Sender] Docket NRC-2015-0057 - Please retain the LNT model

Dear NRC representative,

I am writing to request that you please retain the LNT model as a standard for protection against radiation exposure. It is well studied over time that the linear model is the best applied scientific model in this context.

I am highly concerned that an amendment of standards to using the Hormesis model would directly result in increased public exposure to radioisotopes surrounding nuclear facilities, and ultimately present an increased long term human cancer risk.

Thank you for considering this comment.

Sincerely,

Jonathan Thyer
