

U.S. Nuclear Regulatory Commission Public Meeting Summary

September 8, 2015

Title: Public Meeting and Teleconference to Discuss Integrated Prioritization and Re-baselining of NRC Activities (Project Aim Initiative)

Meeting Identifier: 20151240

Date of Meeting: September 1, 2015

Location: TWFN-2-B1

Type of Meeting: Category 3

Purpose of the Meeting(s): The purpose of this meeting was for NRC staff to share information and seek input from its stakeholders on the agency's work. This input will assist the agency in evaluating what activities can be shed (stopped), performed with fewer resources, or performed with a different priority, while still fulfilling its regulatory mission in a manner consistent with the NRC's Principles of Good Regulation and its Organizational Values. To assist participants, questions were provided on the agenda. NRC will also accept written comments and views on its Prioritization and Re-baselining initiative through September 15, 2015. Comments received after that date will be considered as time permits.

Summary: The meeting was attended by close to 70 participants on the phone and in person, with roughly half being from the industry or non-government organizations. The NRC received quality feedback on a range of subjects, including specific rulemakings, the frequency of inspections, and consistency in NRC internal processes, to name a few. We expect more in written comments due by September 15. The feedback will be considered, along with NRC staff suggestions, over the next few months. An unedited transcript of the meeting is attached.

Action Items/Next Steps:

- Comments received at the meeting, along with those that are received later, will be distributed for use in the prioritization and re-baselining work.
