Mr. Ivan Selin  
Chairman  
Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Selin:

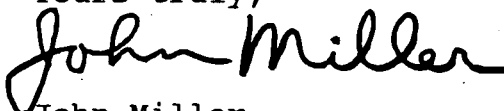

Enclosed please find correspondence from my constituent, Mr.  
William Cecil, regarding North Carolina's Duke Power Company.

Could you please respond to his questions. Mr. Cecil's address  
is:

Mr. William Cecil  
6036 30th Avenue NE  
Seattle, WA 98115-7206

Thank you for your kind attention to this matter.

Yours truly,

John Miller  
Member of Congress

Representative John Miller  
322 CHOB  
Washington, D.C. 20515-4701

November 25, 1991

Dear Representative Miller,

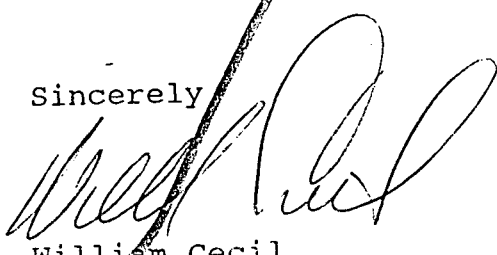

This last week, it was announced that Duke Power Company of Charlotte, North Carolina, experienced a problem with one of their nuclear power plants. The news reports of this event noted that the Nuclear Regulatory Commission (NRC) had issued "numerousness warnings" to Duke Power. As a share holder in Duke Power, I am interested in the extent of these warnings and how they compare, in both quantity and severity to other nuclear power plant operations.

I am requesting the assistance of your office in collecting the following information regarding Duke Power of Charlotte, North Carolina:

- o How many warnings, issues, or findings has the NRC sighted Duke Power for in the last 18 months?
- o How many of the above warnings, issues, or findings remain unresolved past the corrective action date established by the NRC?
- o How does the number of warnings, issues, and/or findings compare with other nuclear power plant operations during the same period?

I look forward to the level of responsiveness and support that your office has provided in the past.

Sincerely

William Cecil  
6036 30th Ave. NE
