AND 194 FOR UPGRADE TO EMERGENCY ACTION LEVEL SCHEME
(TAC NOS. MF4195 AND MF4196)

Dear Mr. Koehl:

By letter dated August 20, 2015 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML15201A195), the U.S. Nuclear Regulatory Commission (NRC) issued Amendment No. 206 to Facility Operating License No. NPF-76 and Amendment No. 194 to Facility Operating License No. NPF-80 for the South Texas Project, Units 1 and 2, respectively. The amendments consist of changes to the emergency action level scheme in response to your application dated May 15, 2014, as supplemented by letters dated July 10, 2014, February 11 and 26, and July 1, 2015.

Due to an administrative error on the part of the NRC, item 2 on page 2 of Enclosures 1 and 2 was missing the safety evaluation date of August 20, 2015. This error is administrative in nature and does not affect the NRC staff's overall conclusions associated with Amendment Nos. 206 and 194. Enclosed are corrected enclosure pages for your records.

We regret any inconvenience this may have caused. If you have any questions, please contact me at 301-415-1906 or via e-mail at Lisa.Regner@nrc.gov.
