Subject: [External_Sender] Radioactive Waste Disposal 10 CFR61 Docket ID NRC-2011-0012

Dear Secretary,

Please remove the following provisions in your proposed 10 CFR 61:

1. All provisions that would allow nuclear waste to go to regular trash or other unregulated places or into commercial recycling into consumer goods. Delete the existing "§ 61.6 Exemptions" and the proposed addition to "§61.7 Concepts" that would allow deregulating, exempting and releasing radioactive waste and materials from radioactive regulatory control.
2. The proposed change from the current allowable public dose of 25 millirems/year to the higher 25 millirems EDE, 100 millirems EDE, 500 millirems EDE or even more per year.
3. All provisions that would allow dump operators to do their own "Performance Assessments" and make "Safety Cases" to claim they can put more kinds of radioactive waste and longer-lasting nuclear waste in shallow land burial trenches.
4. All provisions that would not allow states to continue setting stricter, more protective standards than NRC. Remove the "Level B" compatibility requirement.
5. All provisions that would require merely labeling various time periods (compliance, performance, protective assurance, etc) and assigning increasing allowable doses.

Thank you.

Peter Lambert
