Dear Ms. Parr:

By a letter dated January 26, 2015, the Westinghouse Electric Company submitted a report of changes made to the Columbia Fuel Fabrication Facility during 2014. A review of the submittal by the staff at the U.S. Nuclear Regulatory Commission (NRC) did not identify any non-compliances with the requirements of Title 10 of the *Code of Federal Regulations* (10 CFR) Section 70.72, and did not identify any changes that would have required prior approval by the NRC. The NRC staff have no further questions at this time. An inspection may be performed at a future date in accordance with our inspection schedule.

By this letter, Technical Assignment Control Number L33362 is closed.

In accordance with 10 CFR, 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's Agencywide Documents Access and Management System (ADAMS).
