Dear Nuclear Regulatory Commission ~

I have attended the hearing regarding the license renewal of Crow Butte Uranium mine in Crawford, Nebraska.

I find the application for renewal must be denied due to the egregious errors, omissions, lack of consultations, out-dated and cherry picked science and lack of ensured safety on behalf of the mine to protect the community, land, water and wildlife.

In order to clarify, I urge you to deny the permit renewal as it is clear from the evidence presented, that the Crow Butte Uranium mine and Cameco Incorporated are violating their license terms, by disturbing the land and their inability to restore the water and land back to their original state - as listed in their permits.

The hearing has been fair, conclusive and overwhelmingly leads to a path of denying the permit.

Many thanks for your inclusion of my opposition in your record. Sincerely,
Suzee Tonfishnik
