

## Regulatory Guide Periodic Review

**Regulatory Guide Number:** 8.35  
**Revision:** 1  
**Title:** Planned Special Exposures  
**Office/Division/Branch:** RES/DSA/RPB  
**Technical Lead:** Casper Sun  
**Staff Action Decided:** Reviewed with no Issues Identified

**1. What are the known technical or regulatory issues with the current version of the Regulatory Guide (RG)?**

RG 8.35 (Rev. 1), published in August 2010, provides guidance on the conditions and prerequisites for permitting planned special exposure(s) that are consistent with the current requirements in Title 10 of the *Code of Federal Regulations* (10 CFR) Part 20, "Standards for Protection Against Radiation." The staff did not identified any technical or regulatory issues associated with the guide and no changes are warranted.

**2. What is the impact on internal and external stakeholders of not updating the RG for the known issues, in terms of anticipated numbers of licensing and inspection activities over the next several years?**

Since no technical or regulatory issues were identified, there is no impact to internal or external stakeholders resulting from these activities.

**3. What is an estimate of the level of effort needed to address identified issues in terms of full-time equivalent and contractor resources?**

Since no technical or regulatory issues were identified, no resources are required.

**4. Based on the answers to the questions above, what is the NRC staff action for this guide (reviewed with no issues identified, reviewed with issues identified for future consideration, revise, or withdraw)?**

Reviewed with no issues identified.

5. **Provide a conceptual plan and timeframe to address the issues identified during the review.**

N/A. No issues were identified during the review.

**NOTE: This review was conducted in September 2015 and reflects the staff's plans as of that date. These plans are tentative and subject to change.**
