Dear Secretary,

The NRC should reject--please-- the three petitions for rulemaking cited in the subject line out of hand.

The petitioners have done the nation a disservice by attempting to weaken these standards using a scientifically suspect model, and thus directing attention away from the real need to strengthen those standards, in particular to account for the reality that radiation is more harmful to children, especially girls, and to women than it is to men, and that the "standard man" approach used by the NRC allows for even greater exposure levels to those who are more vulnerable.

Any changes to radiation regulations contemplated by the NRC should be in the direction of strengthening, not weakening them.
