6.4.2

A respiratory protective program approved by the Commission shall be in force

6.4.3 Administrative procedures shall be developed and implemented to limit the working hours of station staff who perform safety-related functions, e.g., senior reactor operators, reactor operators, nuclear equipment operators, and certain maintenance personnel.

Any deviations from the above procedures shall be authorized by the Station Manager (or designee) in accordance with established procedures and with documentation of the basis for granting the deviation. Individual overtime shall be periodically reviewed to assure that excessive hours have not been worked. Routine deviation from the above guidelines is not authorized.

Attachment 2  
No Significant Hazards Consideration Evaluation

## No Significant Hazards Consideration Evaluation

Duke Power Company (Duke) has made the determination that this amendment request involves a No Significant Hazards Consideration by applying the standards established by the Commission's regulations in 10 CFR 50.92. This ensures that operation of the facility in accordance with the proposed amendment would not:

- (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or
- (2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or
- (3) Involve a significant reduction in a margin of safety.

The Commission has provided guidance concerning the application of these standards by providing certain examples (48 FR 14870). Example (ii) of the types of amendments considered not likely to involve significant hazards considerations is applicable to this amendment request. This specific example involves amendment requests that are considered to be a change that constitutes an additional limitation, restriction, or control not presently included in the technical specifications.

The proposed Technical Specification amendment addressed in this submittal has been determined by Duke to be an additional limitation change. Briefly, the proposed amendment delineates the need for administrative controls to limit the working hours for station staff performing safety-related functions.

Duke has determined, based on the consideration that the requested amendment is administrative in nature, that the revision does not involve a significant increase in the probability or consequences of accidents previously considered, nor create the possibility of a new or different kind of accident, and will not involve a significant decrease in a safety margin. Therefore, Duke concludes that there is no significant hazards consideration involved in this amendment request.
