Gentlemen:

We have received a copy of your application dated October 8, 1984, which was filed with the Office of Nuclear Reactor Regulation (ONRR) for review. This application proposed certain Technical Specification (TS) changes relating to NUREG-0737 items for the Oconee Nuclear Station Unit Nos. 1, 2, and 3.

Fees pursuant to 10 CFR 170, as revised June 20, 1984, were not remitted with your application. This revised rule requires licensees to remit an application fee of \$150 with each application for license amendment, relief, exemption and other request. Therefore, it is requested that your Company remit the required application fee of \$150 for your October 8 request. Your Company will be billed for any additional costs for the review of your application in accordance with 10 CFR 170.12(c) and 170.21.

When applications such as yours are requested for the purpose of enhancing the safe operation of a nuclear facility or to correct a problem or potential problem relating to the operation of the facility, they are not exempt from fees because they are not for the purpose of simplifying the license or TS for the convenience of the Commission.

Sincerely,

Original Signed by:
