DUKE POWER COMPANY P.O. BOX 33189 CHARLOTTE, N.G. 28242

HAL B. TUGKER VICE PRESIDENT NUCLEAR PRODUCTION

TELEPHONE (704) 373-4531

March 25, 1986

Mr. Harold R. Denton, Director Office of Nuclear Reactor Regulation U. S. Nuclear Regulatory Commission Washington, D. C. 20555

Attention: Mr. John F. Stolz, Project Director PWR Project Directorate No. 6

Subject: Oconee Nuclear Station Docket Nos. 50-269, -270, -287

Dear Sir:

Pursuant to 10 CFR 50, Part 50.90, please find attached a proposed amendment to the Oconee Facility Operating License and revision to the Oconee Nuclear Station Technical Specifications. This proposal (Attachment 1) consists of changes to Technical Specification 3.5, Instrumentation Systems and Tables 3.5.1-1 and 4.1-1.

The proposed amendment is in response to Generic Letter 85-10, dated May 23, 1985 and the NRC letter to B&W Owner's Group dated December 6, 1985. Generic Letter 85-10 requires that the appropriate surveillance and test sections of the technical specifications be revised to include independent testing of the shunt and undervoltage trip attachments and silicon controlled rectifiers.

By a letter dated September 17, 1985 Duke Power Company submitted an amendment request in response to Generic Letter 85-10 and the NRC letter dated February 11, 1985. That submittal included a proposed revision to Table 4.1-1 of the Oconee Technical Specifications to specifically note that the shunt and undervoltage trip attachments are independently tested. Duke Power Company also indicated that additional Technical Specification changes in response to Generic Letter 85-10 will be submitted as they become available.

The attached proposed Technical Specifications are intended to supplement our previous submittal dated September 17, 1985. The proposed changes in Table 4.1-1 are slightly different from our September 17, 1985 submittal. The difference is due to editorial corrections and does not alter the intent of the proposed change in Table 4.1-1.

Duke Power Company has performed an evaluation in accordance with the standards in 50.92 and determined that the proposed amendment request involves no significant hazards considerations. Technical justification and basis in support of this evaluation are presented in Attachment 2.

Mr. Harold R. Denton, Director March 25, 1986 Page Two

Duke is forwarding a copy of this application to the South Carolina Department of Health and Environmental Control for review and, as appropriate, subsequent consultation with the NRC staff.

Inasmuch as these proposed changes are supplemental to Duke's September 17, 1985 amendment request, Duke considers that no additional application fee is necessary.

Very truly yours,

H.B. Tuch 1950

Hal B. Tucker
