Subject: Oconee Nuclear Station  
Docket Nos. 50-269, -270, -287  
Main Steam Stop Valve Leak Testing  
Proposed Technical Specifications

Gentlemen:

Pursuant to 10CFR50, Part 50.90, please find attached (attachment 1) a proposed amendment to the Oconee Nuclear Station (ONS) facility operating licenses and revisions to the ONS Technical Specifications. As discussed in my request for temporary waiver of compliance dated June 28, 1989, changes to Specification 4.8 are necessary in order to delete requirements for leak testing of main steam stop valves. The ASME Section XI IWV-2200 valve category for the main steam stop valves is currently under evaluation. Upon completion of this evaluation and if necessary, leak testing requirements per IWV-3420 will be incorporated into the inservice test program.

I have determined the attached proposed amendment as having no significant hazards considerations. Attachment 3 provides the No Significant Hazards Consideration Evaluation. Attachment 2 provides the supporting Technical

Justification. I am forwarding a copy of this application to the South Carolina Department of Health and Environmental Control for review and, as appropriate, subsequent consultation with the staff.

Very truly yours,

Hal B. Tucker  
PJN
