Hi Shawn,

No use since 2007.

Sharon,

I am processing the subject amendment to remove 35.300 uses from the license. During the previous inspection conducted in November 2012, it was determined that no 35.300 uses had been performed since 2007.

Please confirm if any 35.300 use has occurred since November 2012.

If there has been 35.300 materials utilized, please provide transfer and survey data to ensure that no materials remain at the licensed location of use.

Please let me know if you have any questions or need additional information.

Shawn
