General Comment

Please do NOT increase any "acceptable" radiation levels! We all know there IS no acceptable level for human beings when we are addressing nuclear power plants. Just look at the damage done to the Pacific Ocean as evidenced by the Fukushima Daiichi meltdowns. The word is getting out and people are VERY upset. To say that radiation, in small amounts, is tolerable is tantamount to saying arsenic and lead are acceptable to any species of life form. It is flawed logic, and even more importantly, it is morally and ethically unacceptable.
