Dear Miss Hatfield:

This refers to your license amendment request dated July 14, 2015. Enclosed with this letter is the amended license. This Amendment adds the new facility as requested to enable you to move your licensed activities. Prior to release of your current facility at 87 Grose Ln, for unrestricted use, you must receive an Amendment removing your current facility from your license. Include in the request, the results of surveys or a confirmation that there was no leakage of radioactive material while the gauges were stored at this location. When you submit the Amendment request, please refer to the Control Number at the top of this letter.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).
