General Comment

September 8, 2015

Dear Commission members,

As an American citizen living in Japan, I have watched, and met with, the victims of the Fukushima disaster, including American service personnel on board the USS Reagan at the time of the disaster. Their stories, and the multiple illnesses they report, are deeply disturbing, especially those of children with ever increasing incidents of thyroid cancer and other illnesses. Some Fukushima women are reported to have been pressured into having abortions due to their abnormal fetuses.

Based on this first (and second) hand evidence, I can only entreat you not to abandon your current standards for radiation contamination.

Sincerely,

Brian Victoria, Ph.D.

Kyoto, Japan

Resident of Kyoto, Japan
