General Comment

There is no evidence to support hormiensis, and there are volumes to support that no safe threshold exists for ionizing radiation in regards to human health. This proposed rule change is clearly another act against humanity for the profit of the Nuclear industry. This dangerous industry should diversify its interests and find a way to profit humanity with safe enterprises, rather than insist on this non-necessary and deadly nuclear power profit model. Any person, government, or commercial entity that supports increasing the allowable limit for ionizing radiation exposure for humans is either grossly ignorant, or has criminal intent. Do not support the increase of ionizing radiation under any circumstances. A world of people will know what you have done.
