## General Comment

There is a clear line of logic from the susceptibility of fetuses and children to nuclear radiation, to the No Safe Threshold standard implemented for protection of humans and societies. Industries must not be allowed to police themselves in the area of public safety, as profit always supersedes human safety on their balance sheet. The facts are clear on the susceptibility of the very young to ionizing radiation, and yet this proposal for raising the allowable dose of radiation for pregnant women fetuses, and young children is blatantly presented due to the heavy cost to the nuclear industry. It is preposterous that such a travesty is even considered for proposal, but even more so that it is being considered by the NRC. That the NRC will consider this proposal, gives much credence to the popular position that the NRC is simply an arm of the nuclear industry.

Please stick to your legal mandate and protect us, the people of the world, from the caprice of this ever more dangerous and autonomous industry. The statistical information provided by health issues faced by humans downwind of nuclear accidents, such as Three Mile Island, Chernobyl, Fukushima, Waste Isolation Pilot Plant, (to name only a significant few) must compel the NRC to regulate more stringently on behalf of the world population it is mandated and pledged to protect.

Reject any attempt to liberalize ionizing radiation limits for any life forms, especially us humans.
