General Comment

The specious science of "homesis" directly flies in the face of the National Academy of Science BEIR IV comprehensive study of the ACTUAL effects of radiation exposure, as opposed to the fantastical imaginings of the lobby that stands to benefit. Recent peer reviewed science shows allegedly "low level" radiation to be more harmful than predicted, not less.

If fantasy is instituted as science then the entire nation is put at severe risk. This is a form of nuclear madness, where we should be strengthening standards not relaxing them. The nuclear industry is an antiquated dinosaur that clearly corrupts science in the service of profit seeking. Do not entertain fiction as fact.
