RE: NRC License SUA-1548 and License SUA-1534
Regulatory contact

Dear Mr. Mandeville:

We have recently made changes to the staff in the Casper Office. We are now in the process of restructuring safety, health, environment and quality staff assignments. The attached document outlines the individuals currently overseeing the various activities as we transition through this process. Cameco will continue licensing efforts in Wyoming and Nebraska, with the personnel identified in the attachment.

An updated project intent letter will be sent at the completion of this process. We anticipate a seamless transition with the reassignment of activities. Please share these changes with your staff and we continue to look forward to working with your team.

Thank you for your support in this effort. If you have any questions please feel free to contact me at (307) 333-0009.

Sincerely,

A handwritten signature in black ink, appearing to read "Jim Stokey".

Jim Stokey
Vice President, Projects & Growth
Cameco Resources
