Bruce – here is the information you requested from CB&I (Formally Shaw). This information is based off of last outage (L2R14) and projections for this coming outage (L1R15). This information only applies to CB&I.

- 1) Permanent (more than 6 months) on-site contractors – **31**
- 2) Average outage workforce (above and beyond what is considered the normal plant workforce) – **approx 800 craft**
- 3) Permanent contract employees' counties of residence (zip codes by employee (without names) is fine).

Subject: Human Resources Issue for Next Week

Hi Bruce –

FYI, I am attaching the May 31 version of the schedule for Tetra Tech’s visit during June 4 to 6, 2013. I have dispatched invitations for all of the events and interviews shown on the schedule.

Also, some human resources information is needed that is not covered by the scheduled interviews and will require assistance from the LaSalle Human Resources department. I’m wondering if you could identify a contact person and see whether we could obtain this information and provide it to Tetra Tech while they are on site next week?

1. Employment numbers in the following format:

- Permanent on-site workforce
 - Permanent (more than 6 months) on-site contractors
 - Average outage workforce (above and beyond what is considered the normal plant workforce).
2. Permanent and permanent contract employees' counties of residence (zip codes by employee (without names) is fine).
 3. Identify where the majority of the outage workers stay while working at the site.

Let me know whether you think we can get the information while Tetra Tech is there.

Many thanks.

Nancy
