General Comment

I am adamantly against changing from the LNT to the Radiation hormesis method. We must listen to our scientists like the Union of Concerned Scientists and Dr. Helen Caldicott on the immediate and long range dangers to ourselves and future generations:

"Children are 10 to 20 times more radiosensitive than adults, and fetuses thousands of times more so; women are more sensitive than men.

Radiation of the reproductive organs induces genetic mutations in the sperm and eggs, increasing the incidence of genetic diseases like diabetes, cystic fibrosis, hemochromatosis and thousands of others over future generations. Recessive mutations take up to 20 generations to be expressed."

HELEN CALDICOTT

Bermagui, Australia, Oct. 23, 2013

I strongly urge strengthening regulations even beyond the LNT!

Sincerely,
TC Rockett
