## General Comment

NRC- 2015- 0057 - 0086 FERC needs to step up to the plate and recognize that the nuclear plants are failing. Changing the rules to cover up these failings is a crime. Our children and grandchildren will die earlier as a result of the underhanded dealings we are doing today. People are getting more diseases and the CDC scratching their heads wondering why? It is not a great mystery. We are being exposed to greater amounts of everything Daily. The Turkey Point Power Plant in Miami Dade County has been overheating for decades and was just given an EXTRA 100 MILLION GALLONS A DAY OF MORE FRESH WATER because it is overheating and killing the 150 plus miles of so called cooling canals surrounding the plant. The South Florida Water Management District doesn't care about what is the equivalent of 5 cities daily drinking water. It was stated "that power plants will get water before people." The Nuclear Plants are already exceeding the limits so what is FERC going to do raise the limits. FERC exists to PROTECT PEOPLE not the other way around. Lately watching FERC reps meet with the Execs of the power companies is like watching football players when they make a good play they walk around slapping each other on the ass saying good deal. Sound reasoning and Scientific evidence is FERC's job you already know the power companies are skipping maintenance and upkeep. Looking the other way has become the norm. The changing of this rule is just another example of ignoring the facts, the health of US citizens be damned.
