General Comment

We need to maintain and STRENGTHEN the Linear-No-Threshold" (LNT) basis for protecting the public against exposure to nuclear radiation, not eliminate it! Adoption of the "junk science" hormesis model is simply not warranted by any objective science. The very idea that nuclear radiation could in any way benefit human or other life is preposterous. Studies show that even minute exposures can have lasting, serious effects on organisms. Please, do not deliver a gift to the nuclear industry in the form of a capitulation to their goal of abandoning all efforts to safeguard the public.
