Re: Dr. Benjamin Quiñones
License 52-23038-01 / 03020203
Strontium-90 permitted by 10CFR 35.400

Dear Mr. Healy,

The following is to inform the commission that the B-radiation unit is in our office, in storage, awaiting proper disposal. I am NOT performing any procedures with the unit, as the license is expired. I spoke to Mr. David Rhoe today. He informed me that he is still awaiting a quote from the disposal facility in order to proceed. Therefore, I do not have a definite time frame for the disposal of the unit. Mr. Rhoe is available to answer any further questions you have regarding this matter. You may reach him at (787) 245-7248.

Thank you and have a nice day.

Sincerely,

Benjamin Quiñones, MD
