Subject: NRC license renewal - questions
Attachments: Ferris St Univ 586390 RAI.docx

Mr. McCormick,

I am the reviewer on the renewal application for your NRC license. I have a few questions I need answered in order to complete my review. I also left you a voice-mail message on this matter.

Please see the attached Request for Additional Information. You may respond by e-mail by attaching a **signed PDF letter** back to me with your responses. Please mark it as "**Additional Information for CN586390**".

If you have any questions, please contact me.

Thanks.
Bryan

Request for Additional Information

Ferris State University - Big Rapids, MI (CN 586390)

- 1) With regard to Item 5 of your application dated 03/19/15, please verify the make and model nos. of the nuclear moisture/density gauges possessed under your license. I have looked at information contained in your letter dated January 30, 2009 concerning these gauges and want to confirm that these are the same gauges (2 Troxler Model 3440 gauges).

Please either confirm the information and/or re-submit the information contained in your January 30, 2009 letter.

- 2) With regard to Item 5 of your application dated 03/19/15, please check the sealed sources listed in the Nuclear Medicine Technology to confirm that they fall under 10 CFR 35.65. If so, I can authorize you for any source under 35.65 instead of listing them by isotope. If they do not fit under 35.65, I will need make and model no. information to list them individually.

I believe these would correspond to the materials listed in Subitems 6.A.-6.G., 6.L. and 6.M. on your license.

Also, here is a link to 10 CFR 35.65 for reference: <http://www.nrc.gov/reading-rm/doc-collections/cfr/part035/part035-0065.htm>

- 3) With regard to Item 7 of your application dated 03/19/15, please confirm that Timothy Vander Laan is to be removed as an authorized user from the license. He is currently listed as an authorized user, but was not included in the renewal application.
- 4) Regarding Subitems 6.H. (Mo/Tc generators) and 6.K. (Co-60 source), please clarify the status of these items. Do you no longer want or need them listed?
