## General Comment

I do not support elimination the "Linear No-Threshold" (LNT) basis of radiation protection. My lay understanding is that there can be no safe level of exposure because exposure is additive. I must be able to have necessary medical radiological exposure but I do not have to agree to allow power plants to expose me to more. Sure, I understand that there are naturally occurring sources and I do eat bananas but I choose not to incur additional exposure for profit making companies who do not have my best interests at heart. Honesty hasn't been something the US nuclear industry could be relied on to provide.
