General Comment

Please do not change the long used linear no threshold model for determining standards for protection against radiation. We are already being exposed to plenty of radiation from cosmic rays on top of radiation from coal power plants and hydraulic fracturing wastes. The last thing we need is the idiotic idea that "a little radiation is good for you". Anyone who would say that does not have an understanding of basic physics.

Maurice J. Dupre', Ph. D., Mathematics, U of PA, 1972
