## General Comment

Fetuses and children are the most vulnerable to radiation and women more vulnerable than men. Even a little radiation is BAD for you. It can give you cancer and other diseases. The NRC should NOT adopt a 'little radiation is good for you' model. Instead, they should fully protect the most vulnerable which they are failing to do now.

I urge commissioners of the NRC to decide what's REALLY in best interest of protecting the public at large even though like the Atomic Energy Commission which it grew out of, the NRC is an unabashed booster of nuclear technology and long devoted to drastically downplaying the dangers of radioactivity. I live in McCracken county KY, 10 minutes east of the Paducah Gaseous Diffusion Plant. McCracken county has cancers unique to people living in this area!! I vehemently oppose the Linear No-Threshold Model.
