Docket: NRC-2015-0057

Linear No-Threshold Model and Standards for Protection Against Radiation

Comment On: NRC-2015-0057-0086

Linear No-Threshold Model and Standards for Protection Against Radiation; Extension of Comment Period

Document: NRC-2015-0057-DRAFT-0344

Comment on FR Doc # 2015-20722

Submitter Information

Name: J. Martinez

General Comment

This guy says it better than I ever could: "If the hormesis theory were anything but a crackpot theory being promulgated by nuclear industry Dr. Strangeloves, we should all have robust immune systems like Superman by now. Instead, we have had since the dawn of the nuclear age, skyrocketing cancer rates. And before the nuke shills pile on, no, I'm not saying all cancer is a result of only radiation. Unfortunately, because radiation is invisible, and does it's cumulative damage over time, it is almost impossible to point to any one source of it as a culprit in an individual's illness. One person's bone cancer may have been the result of ingesting some strontium 90 in dairy food, that came from a cow grazing in a contaminated field hundreds of miles away from a nuclear incident. An unexpected heart attack from cesium, thyroid cancer from some radioactive iodine, and on and on with all the hundreds of deadly isotopes created by nuclear fission."

I couldn't agree more and if that isn't enough, how about this: FUKUSHIMA!!
