## General Comment

I have had two cancers. One, Chronic Myelogenous Leukemia, was the direct result of overexposure to x-rays. I can hardly respond rationally to the idea that Radiation is good for you! The very idea is ridiculous. I see this radiation hormesis theory as just another way to loosen regulations and save someone from paying fines or spending money to protect the public from a known threat. Please don't let this terrible policy change take place for all our sakes.
