General Comment

NRC-2015-0057.

The NRC, an outgrowth of The Atomic Energy Commission is an unabashed booster of nuclear technology long devoted to drastically downplaying the dangers of radioactivity.

Contrary to your findings, A little radiation is BAD for me.
It can give me Cancer and other diseases.

NRC should NOT adopt a "little radiation is good for you model". The "radiation hormesis" theory is a dangerously BAD IDEA!!!

Adoption of the hormesis theory could impact significantly on the NY metropolitan area. It could affect the clean-up of radioactive material underway at Brookhaven National Laboratory here on Long Island.

I fully intend to get this information about your potential adoption of this theory into every household and grass roots organization available, and enlist their support for a strong public stand against this proposed change.
