September 18, 2015

Dear Dr. Gaskins,

We would like to amend our license # 31-30650-01 located at The Complete Cat Veterinary Clinic in Brookfield, CT, to add Dr. Sharon Eisen, DVM as an authorized user of I-131 therapy in the treatment of feline hyperthyroidism.

As the authorized user and RSO, I have trained Dr. Eisen in the following areas in the form of lecture, demonstrations and providing self study materials over the past 10 years in the treatment of over 800 feline patients.

- Radiation Protection, principle, characteristics of ionizing radiation including hazards and biological effects.
- Units of radiation dose and quantities pertaining to I-131, including activity, license dosing limits, receipt and administration.
- Radiation detection instrumentation including use of survey meters, bioassays, and recordkeeping.
- Biological hazards or exposure to radiation (appropriate types and forms of byproduct material) including ALARA (As Low as Reasonably Achievable), dosimetry and occupational dose, in house work rules, and emergency procedures.
- Hands on use of radioactive materials including license limits, activity, receipt, administration, and disposal of radioactive materials.

I thank you for your time and efforts on our behalf.

Sincerely,

Dr. Victor Rendano, Jr, VMD, DACVR, DACVR (RO)
RSO
