

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

REGION III  
2443 WARRENVILLE RD. STE 210  
LISLE, IL 60532-4352

OCT 05 2015

John P. Lowden, M.S.  
Radiation Safety Officer  
Indiana University Health  
Goshen Hospital  
Department of Nuclear Medicine  
200 High Park Avenue  
Goshen, IN 46526

Dear Mr. Lowden:

Enclosed is Amendment No. 59 to your NRC Material License No. 13-18845-01 in accordance with your request. Please note that the changes made to your license are printed in **bold** font.

We also made some minor updating and formatting changes to your license, which are also shown in **bold** font, especially the addition of ADAMS Accession Numbers in Condition No. 14.B of your license.

Please also note that we deleted the "Letter received June 3, 2011 (regarding HDR shielding)" from Condition No. 14.C., as it appeared on Amendment No. 58, because it was a duplication of the previously "tied-down" letter dated June 1, 2011, in Condition No. 14.B.

We deleted the wording "Prior to first use of this device, the licensee shall provide the training required by 10 CFR 35.690(3)(c)," as it appeared on Amendment No. 58, Condition No. 12.C. for Authorized Medical Physicists Jeremy P. Blauser, M.S. and Samantha Korda, M.S. This wording was not necessary for these authorizations.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

If you have any specific questions concerning this letter or the information we are requesting, please contact me at either (630) 829-9841 or (800) 522-3025, ext. 9841. My fax number is 630-515-1078. My email address is [colleen.casey@nrc.gov](mailto:colleen.casey@nrc.gov).

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The enclosed document contains sensitive security-related information.  
When separated from this cover letter this letter is uncontrolled.

~~Official Use Only - Security-Related Information~~

J. Lowden

The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS).

The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

Sincerely,

Colleen Carol Casey  
Materials Licensing Branch
