

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

REGION III  
2443 WARRENVILLE RD. SUITE 210  
LISLE, IL 60532-4352

OCT 02 2015

Robert F. Turco, Ph.D.  
Radiation Safety Officer  
Mercy Hospital – St. Louis  
615 S. New Ballas Road  
St. Louis, MO 63141-8277

Dear Dr. Turco:

Enclosed is Amendment No. 84 to your NRC Material License No. 24-00794-03 in accordance with your requests dated June 26, 2015, September 11, 2015, and September 25, 2015. We have also updated License Condition Nos. 11.A. and 11.D. to reflect the addition of Item No. 6.U. in the most recent amendment to your license. Finally, we have added NRC Agencywide Documents Access and Management System (ADAMS) accession numbers to License Condition Nos. 20.A. and 20.B. in accordance with recent changes to NRC policy. Changes made to your license are printed in **bold font**.

Please review the enclosed license amendment document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9892 so that we may provide appropriate corrections and answers.

In letter dated September 25, 2015 (including resubmitted June 26, 2015 letter), you provided final close-out information for facilities located at 450 N. New Ballas Rd., St. Louis, MO, 3844 S. Lindbergh Blvd., Sunset Hills, MO, and 101 Progress Pkwy., Sullivan, MO, listed on the above referenced license. Based on its review, the staff has concluded that all licensable radioactive material has been removed from the 450 N. New Ballas Rd., 3844 S. Lindbergh Blvd., and 101 Progress Pkwy. facilities and residual radioactive material attributable to licensed activities does not exceed current NRC criteria.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Enclosure 1 to this letter contains sensitive security-related information.  
When separated from this cover letter this letter is uncontrolled.

R. Turco

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with Title 10 of the *Code of Federal Regulations* Section 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

In accordance with Title 10 CFR 2.390, a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC website at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Sara A. Forster, M.S., Health Physicist  
Materials Licensing Branch  
Division of Nuclear Materials Safety
