Name: Aurora Levins Morales

General Comment

What on earth are you thinking? Radiation standards need to be strengthened, not thrown away! The only conceivable reason to eliminate these protections for the public is to allow nuclear companies to reap more profits, by ending their responsibility for limiting our radiation exposure. Instead of spending money on safety, they could bank it as a bonus. You would be sacrificing the health and well being of the people so already wealthy corporations can be even wealthier. Surely the events in Japan make it clear that nuclear safety is of paramount concern. Bogus science has been used repeatedly to protect corporate interests, from fraudulent medical studies by drug companies, to climate change denial. The proposal that radiation exposure is good for us is blatantly nonsensical and self-serving. Please do your job and protect us.
