South Texas Project  
Units 3 and 4  
Docket Nos. 52-012 and 52-013  
Final Safety Evaluation Report for the South Texas Project Units 3 and 4  
Combined License Application Proprietary Material Review

Reference: Letter from Frank M. Akstulewicz to Scott Head, "Final Safety Evaluation Report for the South Texas Project Units 3 and 4 Combined License Application" September 24, 2015

The Reference requested Nuclear Innovation North America (NINA) to review the provided Final Safety Evaluation Report (FSER) for identification of any proprietary information, security-related sensitive unclassified non-safeguards information (SR-SUNSI), and factual errors. NINA has completed the review and provides the results below.

NINA agrees with the NRC determination that Sections 13.6 "Physical Security" and 13.8 "Cyber Security" of the FSER do not contain any SR-SUNSI material.

NINA noted that the FSER provided for review had two chapters, Chapter 1 and Chapter 3 which contained proprietary information. A public version of these chapters was also provided. NINA has reviewed these chapters and agrees with the NRC designation of the proprietary material and also with the redaction in the public versions. As such, NINA finds that the FSER does contain proprietary information and that the included proprietary information is properly identified in the non-public version and properly redacted in the public version. NINA requests that the identified proprietary information be withheld from public disclosure.

NINA has not identified any factual errors in the FSER.

There are no commitments in this letter.
