General Comment

Well due for reassessment. Should allow for specific licensee amendment of specified values for other tangible costs such as loss of experience of dosed out worker, training costs associated with replacement workers, etc. In other words, they cannot go below these guidelines but can go above factoring other costs. Noticed DOE was conspicuously absent from providing input data. Here at our DOE project, we use \$11,000/Person-Rem as our number because of those other costs.
