General Comment

Please do NOT go ahead with this dangerous proposal. Biscayne and Everglades National Parks will be put at risk. The water used to cool the new reactors will not be pure H2O and is likely to contain harmful chemicals etc.

With the predicted rise in the ocean and with the high risks of hurricanes, expanding this nuclear facility in vulnerable coastlands is stupid!

There is a lack of safe storage area for dangerous radioactive materials.

Why hasn't solar power been given serious consideration and effort?
