SUBJECT: FOXFIRE CONSULTANTS, INC., LICENSE RENEWAL, CONTROL NO. 588721

Dear Mr. Nagle:

This refers to your application dated August 17, 2015, and the subsequent revised application dated September 17, 2015, for renewal of your NRC license. Enclosed with this letter is the renewed license. In accordance with your applications we have removed from Condition 9 of your license the authorization for Troxler Electronic Laboratories Model portable gauges.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

The NRC expects licensees to conduct their programs with meticulous attention to detail and high standards of safety and compliance. Serious consequences to employees and the public can result from failure to comply with NRC requirements, therefore you must conduct your program according to NRC regulations, the conditions of your NRC license, and the representations made in your application.

The NRC will continue to perform periodic inspections of your activities authorized by the license. Failure to conduct your program safely and in accordance with NRC regulations, license conditions, and the representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, imposition of a civil penalty, or an order suspending, modifying or revoking your license.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).
