### QUESTIONS

14.02-16

10 CFR 50 Appendix I as it relates to the effluent releases to a member of the public, in being able to monitor and control effluent releases.

10 CFR 20 Appendix B as it relates to monitoring and complying with the effluent concentration limits specified and Criterion XI, "Test Control."

Staff review of DCD Tier 2, Revision 0, Sections 11.4, "Solid Waste Management System," (SWMS) and 14.2.12.1.104, "Solid Waste Management System Test," found that information on the Test Method and Acceptance Criteria for the SWMS was not fully described. Section 11.4 describes verification of manual and automatic system controls on key system alarms such as high-level alarms associated with the solid waste system simultaneously activated in the MCR, and verification of other alarms such as radiation monitor and isolation valves to monitor and control effluent discharge to the environment and other indications; however, verification of manual and automatic response to normal control, alarms, and indications are not identified in Section 14.2.12.1.104 Acceptance Criteria. Please revise the DCD to include this information and provide a markup.
