## General Comment

If we only invested in our free energy, coming from the sun and from wind. We have 365 days of sun shine why can we not investin solar power and wind power. Fosil fuel, natural gas and nuclear power are so doomed and old, why not be modern and clean? We are on a sure path to distroy our planet with nuclear power. I know we can not completely get rid of it, but we need to reduce and not build more! NO Nuclear plant, not here, not in any other place, stop it!!
