INDEPENDENT SPENT FUEL STORAGE INSTALLATIONS INSPECTION  
REPORT 05000483/2015407 AND 07201045/2015401

Dear Mr. Diya:

On April 30, 2015, the U.S. Nuclear Regulatory Commission (NRC) completed an Independent Spent Fuel Storage Installation Security Inspection at your Callaway Plant. On April 30, 2015, the inspector discussed the results of this inspection with Mr. E. Olson, Security Manager, and other members of your staff. An exit meeting was conducted by telephone on May 4, 2015, with Mr. L. Graessle, Senior Director, Operations Support. The inspector documented the results of this inspection in the enclosed inspection report.

The inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations and with the conditions of your license. Further, the inspection covered the NRC's Additional Security Measures for the Physical Protection of the Dry Independent Spent Fuel Storage Installation. The inspectors reviewed selected procedures and records, observed activities, and interviewed personnel.

The NRC inspector did not identify any findings or violations of more than minor significance.

In accordance with Title 10 of the Code of Federal Regulations (10 CFR) 2.390, "Public Inspections, Exemptions, Requests for Withholding," of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of the NRC's Agencywide Documents Access and Management System (ADAMS).
