Subject: [External_Sender] Verbal Notification of release on permit 633, Wellfield 4/4A, NRC SUA-1548
Date: Friday, October 23, 2015 2:41:59 PM

This email is to document that verbal notification or voice mail was given to your office on 10-23-15 of a reportable release on Permit 633, NRC Source Material License SUA-1548. The release was discovered on Friday 10/23/15 at approximately 9:15 am. The data reported is as follows;

- Location: Booster Station #3, between Wellfields #3 and #7.
 - Release estimated at 41 gallons of production fluid onto the ground surface. Some of the fluid entered into an ephemeral drainage. A sample for uranium content showed 24 ppm.
 - Cause: Pump seal failed on P-305A in the booster station. Pump is isolated for repair.
- The WDEQ-Emergency Response Coordinator (Joe Hunter) was given verbal notification by voice mail and a report has been filed in the WDEQ spill database (#151023-1111).

A written notification will be sent out on or before Friday October 30, 2015.

Please reply or call if more information is needed.
