E-MAIL ADDRESS	TELEPHONE NUMBER X9865	<input type="checkbox"/> E-MAIL	<input type="checkbox"/> INCOMING
		<input checked="" type="checkbox"/> TELEPHONE	<input type="checkbox"/> OUTGOING
ORGANIZATION NRC, RIII	DOCKET NUMBER(S) 030-13166		
LICENSE NUMBER(S) 21-03298-05	CONTROL NUMBER(S) 588135		

SUBJECT
Review of licensee's 10/1/15 response to RAI dated 9/23/15, and Mike's review and my follow-up on his response to me in e-mail dated 10/16/15

SUMMARY AND ACTION REQUIRED (IF ANY)

In a 10/15/15 e-mail I had forwarded to Mike, the licensee's 10/1/15 response to my RAI. The RAI was documented in a 9/23/15 conversation record. The RAI was submitted to the licensee based on Mike's review of the licensee's request to release a waste storage room for unrestricted use. The room was used to store both short and long lived (unsealed) radionuclides.

Mike reviewed the licensee's 10/1/15 response and sent me an e-mail dated 10/16/15. Mike clarified his 10/16 e-mail to me by stating that the licensee's 10/1 response was adequate, and that no additional information was needed.

Mike agreed that the waste storage room could be released for unrestricted use.

Kevin,

Those were the surveys I was looking for. Regarding the records, I was looking at previous license amendments just to check to see if they had anything in the past that may have been not listed – I went back to 2003.

Thanks for the opportunity. Have a good weekend.

Hi Mike.

How far back do you want me to go for records of surveys?

Results of smears conducted on 1/22/15 found no residual contamination. Do you want me to ask for records of smears that they have done in the past?

They submitted a diagram of the area and locations where the smears were taken. Looks OK to me. It's in ADAMS ML15182A215.

Thanks, Kevin

Kevin,

We normally ask for survey records to verify instrument eff., residual radiological contamination (if any), type of nuclides tested against, and where the surveys were taken. I took a brief look at the licensee history and it

looks like no significant long-lived nuclides are a concern here (H-3 and C-14 in those quantities are not usually a significant concern). Otherwise, looks good.

Give me a call or email if you have any other questions. By the way, what number should I contact you at if needed?

Subject: conv record with Children's hospital

Mike,

Attached is a copy of the conversation record documenting my RAI for Children's Hospital – FYI.

Kevin
