

A WANDA GROUP COMPANY

September 22, 2015

Director of FSME

Attn: GLTS

USNRC

Washington, DC 20555-0001

In fulfillment of the requirements of 10 CFR 31.5 (c) 8, we hereby notify you that on September 21, 2015 we transferred the self-luminous exit signs listed on the attached spreadsheet to SRBT, 320 Boundary Rd., Suite 120, Pembroke, Ontario, K8A 6W5, Canada with CNSC License #NSPFOL-13.00/2015. As required, for each sign listed on the spreadsheet, we include the name of the manufacturer, model number, and serial number.

If you should have any questions, please contact me at the address below.

Regards,

Brian Cooksey | AMC Theatres | Director, Facilities
One AMC Way 11500 Ash St, Leawood, KS 64105 | Office: 913.213.2144

DOT Hazmat Training & Acknowledgement

For the transfer of Self Luminous EXIT signs

- Self Luminous EXIT signs are illuminated with internal light sources powered by tritium gas. Tritium gas is a radioactive isotope of hydrogen. For this reason, Federal Regulations require that any person shipping this product must have training sufficient to comply with US Department of Transportation regulations in the Code of Federal Regulations #49 Part 172.
- To receive this training the shipper must read, understand and perform the following steps. Also comply with all instructions contained in "Isolite Packaging Instructions". Place a check mark in each box after completing then sign and date this form.
- Keep this completed form in your files for at least three years in case of regulatory inspection.

- ❑ The EXIT signs are to be shipped as "excepted packages for radioactive instruments and articles (49 CFR 173.424)." The total amount of tritium in each box must be less than 100 curies [ci] or 3.7 terabecquerel [tbq] (add up the amount of each sign). The total amount per shipment must not exceed 1,000 curies or 37 TBq.
- ❑ A sturdy cardboard box will be sufficient to ship these signs because they meet the general package design requirements of 49 CFR 173.410.
- ❑ You must insure that the active materials (the glowing inner tubes) are completely enclosed by non-active components (the sign housing). Each sign must be visually inspected to ensure that it is not crushed or punctured in any way that might cause the inner tubes to be broken.
- ❑ If a transportation incident occurs, you must report the incident to the US DOT per 49 CFR 171.15 and 49 CFR 171.16.

***Please Note: Any signs broken and/or contaminated due to failure to comply with DOT regulation or Isolite Packaging Instructions will be sent, per law, for burial. The shipment generator agrees to be financially responsible for any and all addition costs.**
