Dear MAJ Kimberly Alston,

This is in reference to your letter dated August 26, 2015, in which you submitted your decommissioning funding plan for Nuclear Regulatory Commission License No. 19-23344-01, Docket No. 03020775 to meet the financial assurance requirements. In order to continue our review, we need the following additional information:

10 CFR 30.35(e)(2) states, in part, at the time of the license renewal and at intervals not to exceed 3 years, the decommissioning funding plan must be resubmitted with adjustments as necessary to account for changes in costs and the extent of contamination. In your letter you submitted that there was no change in costs since the last calculation.

- A. Please confirm that the waste inventory is within the cost estimate and there has been no facility modifications that would cause a change to the decommissioning costs.
- B. Please provide evidence from an independent contractor that the rate for the labor costs and the costs of packing, shipping, and disposal per drum has not changed or is within your current estimate.

We will continue our review upon receipt of this information. Please reply to my attention at the Region 1 Office (Address below) and refer to Mail Control No. 589116. If you have technical questions regarding this letter, please call me at (610) 337-5366.

*Please note that you may not reply to this letter by return e-mail. Your reply must be in writing by letter, facsimile (610-337-5269), or signed letter attached to an email. If we do not receive a reply from you within 30 calendar days from the date of this e-mail, we will assume that you do not wish to pursue your application.*
