No we will not need the amended license but you must maintain a copy for your records.

Subject: [External_Sender] Re: Termination of NRC License for EIV

Hi Sattar,

Alan clarified that there will be 2 Amendments done, as I was curious about and wanted clarification to begin with. I will be looking for the Amended License to transfer the Gauge. Once I have that do I need to resend the Termination request along with a copy of the Amended License from SW Cole? Or will you have that on file and just process as it comes through?

Thanks,

Buffi Calden

Ok, I will call Alan.

We have no plans to transfer Gauge until all proper and legal paperwork is in place:)

Thanks,

I explained this to Alan Brown this morning. Please check with Alan Brown and he will, hopefully explain this to you. Please wait until you get a copy of S.W. Cole's amended license before you transfer the gauge.

Sattar,

I understand Completely about the location aspect and that a Transfer needs to take place first before amending that.....what doesn't make sense is that you have to Amend SW Cole License to include the Humboldt but you can't amend their license until our license is terminated (this is according to Alan Brown) and you can't terminate our license without the transfer first.....so how is SW Cole supposed to get

an Amended License when we can't terminate our license first without the transfer? Unless you are able to amend their license to include the Humboldt first, then we transfer, then you terminate our license and Amend their license again to include the 55 Leroy Rd location for SW Cole?

Thanks,

No, it is not confusing. NRC Regulations require that licensed material can only be transferred to another **authorized** recipient. Please review S.W. Cole's license. It does not authorize possession of Humboldt gauges, therefore according to NRC regulations you cannot transfer the gauge to them. S.W. Cole has requested to add Humboldt gauges to their license. You can transfer the gauge to them **after** their request is approved. S.W. Cole had also requested to add the 55 Leroy Road location to their license, but we cannot list one storage locations on two different licenses. That is why it is required that your license needed to be terminate before we can add this location on their license. Please check with Alan Brown and he should be able to explain this to you.

Hi Sattar,

So I am confused then.....you are saying that we have to transfer the Gauge first before terminating our license which means SW Cole needs an amended License to receive it.....but SW Cole can't get the amendment until our license is Terminated, how is that possible?

Buffi:

Please note that S. W. Cole's license does not authorize possession of Humboldt Model 5001 portable gauges that you wish to transfer to them therefore, the transfer will not be in compliance with NRC requirements. You must not transfer the gauge to S.W. Cole until their license is amended to authorize possession of the Humboldt gauges. We are in process of amending their license. Your request to terminate your license is under review and will be processed after the gauge is properly transferred. I explained this to Alan Brown this morning. Please feel free to call me at (610) 337 5364 if you have any questions in this matter. Thank you

Buffi,

I must have sent you a copy of our old license. Attached is the correct license.

Sattar,

Attached is the license to which the material will be transferred and the amendment made for the new location.

Sorry for the confusion.

Please call if you have any questions.

Alana
