General Comment

Is the NRC supposed to protect the radiation workers and the public from ionizing radiation? Well then, even the LNT is too high because it allows some manmade ionization radiation. So do not increase worker and public exposure by switching to a much higher radiation burden put on people. This effort is all about the big money and these big money people do not care who they hurt in order to keep getting their big money. Example: The crown of England still owns mineral rights in a large part of the world, including uranium mining and also (according to a map) in the eastern one-third of the US. Do you think the crown cares who gets too much radiation?

See the summary of a late study "Nuclear Worker Study Affirms that Low Doses of Radiation are Deadly: Increased Cancer Risk Much Worse Than Previously Believed" at

<https://miningawareness.wordpress.com/2015/10/22/nuclear-worker-study-affirms-that-low-doses-of-radiation-are-deadly-increased-cancer-risk-much-worse-than-previously-believed/>

The comment #36 has several links which tells a lot.
